

# Media Rescue.R4

携帯メモリからHDDまで高速対応

## MediaRescue.R4

We develop and sell software mainly for image processing.  
We are introducing "MediaRescue.R4" data recovery software

In many case, we cannot remember name and precise created date of file which was accidentally erased by mistake. We think it is very important that next generation data recovery system should have faster search function to find a file more quickly in addition to recovery function.

**Key features are:**

- Two-step recovery
- Compatible with many kinds of memory cards and HDD
- Compatible with digital camera raw data
- Can take some damaged media
- Back-up function
- Folder browsing function
- Finder function
